2nd International Conference on
Computational Sustainability

June 28–30, 2010
MIT, Cambridge, MA, USA

www.computational-sustainability.org/compsust10

Chairs: Brian Williams, Thomas Dietterich, Carla Gomes

[williams@mit.edu, tgd@cs.orst.edu, gomes@cs.cornell.edu]

CompSust'10 focuses on computational methods for balancing environmental, economic, and societal needs for a sustainable future. Through talks, discussions, poster sessions, and workshops, the conference program will investigate the major problem domains that impact global sustainability, those technologies and processes that offer the greatest opportunity to increase sustainability in these domains, and the fundamental computational methods that support these technologies and processes. Participants include representatives from national and international research institutions and government agencies.

Limited **travel support** is available through the **Doctoral Consortium** for PhD students, post-docs, junior researchers, and junior faculty. Please see the conference website for details.

Participation: Please visit **www.computational-sustainability.org/compsust10** for details on how to participate.

Important Dates:

Early participation and doctoral consortium deadline — May 1st, 2010
Late participation and doctoral consortium deadline — May 31st, 2010

Local Arrangements Chair: Paul Robertson [paulr at bbn.com]
Doctoral Consortium Chair: Ashish Sabharwal [sabhar at cs.cornell.edu]
